WATER SUPPLY TANK

YOUR CONSTRUCTION DEVICE. The ideal tool for the supply of pressurised water in cutting and grinding machines used in the construction sector. It enables users to comply with OSHA 29CFR 1926.1153 standard of respirable crystalline silica in construction work, as well as Directive (EU) 2017/2398 on the protection of workers against risks related to exposure to some agents during work. Also used for cooling the cutting and drilling elements, thereby preventing the overheating.
